

EQUIPMENT OVERVIEW

Continuous cartoner for groups of 6 units. The cycle begins with double-belt accumulation. A cam extracts the flat cardboard while a double starwheel groups the cans in two rows and places them over the lower sleeve. As they advance, guides fold the cardboard around the pack, finishing with top flap gluing.

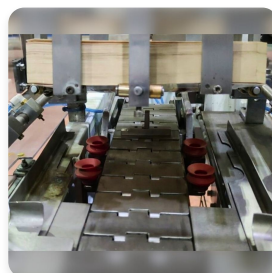

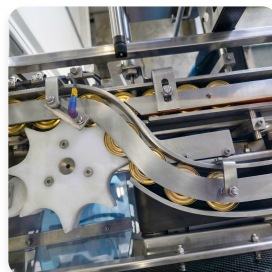

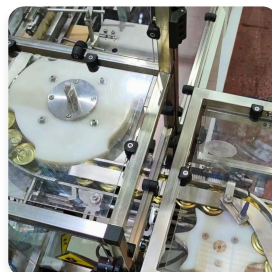

TECHNICAL FEATURES

[WATCH VIDEO](#)

- ✓ **Compatible Formats:** Round Containers
- ✓ **Pack Type:** 6-unit packs
- ✓ **Infeed:** Double belt and double starwheel
- ✓ **Estimated Production:** Up to 100 PACKS/min
- ✓ **Closure:** Automatic Hot Melt glue sealing
- ✓ **Certification:** CE Marking / UNE-EN ISO 13857

Optional Equipment:

- High productivity for demanding production lines
- Complete automation: reduces manual intervention
- Easy inline integration with palletizers and case packers
