

## Eel Gutting Machine

The BAADER 143 guts eel from 130 to 1200 g. The gutting cut is performed in the usual way. The belly cavity is cleaned by scraper, a suction scoop and a rotating brush. The machine can be adjusted for 3 size ranges. Eel support troughs, scrapers and scoops for the different size ranges can easily be exchanged. One set of parts is available for small eels from 40–130 g as optional equipment.

<b>Operator requirements</b>	1 person
<b>Throughput</b>	20 eels/min
Graph on the right	Machine output at 18 eels/min
<b>Power requirements</b>	2.24 kW
<b>Water consumption</b>	approx. 3 l/min
<b>Dimensions</b>	3.00 × 1.00 × 1.22 m
crated for shipping	approx. 3.25 × 1.25 × 1.60 m
<b>Weight</b>	approx. 350 kg net
	approx. 630 kg gross
