

Bone Separator

This machine produces bone-free fish meat from pinbone cuttings but also from other fish cuttings with bones and skin which are yielded in fish processing. The material is submitted to a brief pressing operation between an elastic belt and a perforated drum, so that the fibre structure of the fish meat is maintained. This material may be processed into high-grade products.

Operator requirements	1 person
Throughput	approx. 500 kg of raw mat./h
Power requirements	1.5 kW
Dimensions	approx. 1.40x0.90x1.10m
crated for shipping	approx. 1.15x0.90x1.33 m
Weight	approx. 235 kg net
	approx. 375 kg gross
